Skills

-  **Unity Engine**
Expert
C#, Editor Tools, Performance Profiling

-  **Unreal Engine**
Advanced
C++, Blueprints, UE5 Features

-  **Programming Languages**
Expert
C#, C++, Python, HLSL/GLSL

-  **Game AI**
Advanced
Behavior Trees, FSM, Pathfinding, Navigation

-  **Physics & Mathematics**
Advanced
3D Math, Collision Detection, Rigid Body Dynamics

Summary

Passionate game developer with 5+ years of professional experience creating engaging gameplay systems and polished player experiences across multiple platforms. Specialized in Unity and Unreal Engine with strong expertise in C#, C++, and game design principles. Proven ability to collaborate effectively with cross-functional teams including designers, artists, and QA to deliver high-quality games on time and within scope.

Education

University of Washington

Bachelor of Science • 3.6 GPA

Computer Science

Seattle, WA • 2014 - 2018

Concentration in Game Development. Relevant Coursework: Game Engine Architecture, Computer Graphics, Artificial Intelligence, Physics Simulation, 3D Mathematics, Software Engineering, Data Structures & Algorithms

Experience

- Cascade Studios**Seattle, WAMarch 2022 - Present
- Senior Game Developer
- Lead gameplay programmer on an unannounced AAA action-adventure title built in Unreal Engine 5 for PC and next-gen consoles
 - Architected and implemented core combat system including hit detection, combo mechanics, and enemy AI behavior trees serving 15+ enemy types
 - Developed custom editor tools in C++ that reduced level designer iteration time by 40% and improved workflow efficiency across the team
 - Optimized rendering pipeline and gameplay systems to maintain 60 FPS performance target on all supported platforms, achieving 95% frame rate stability
 - Ad nostrud enim adipisicing ea proident aliqua veniam nisi amet ea irure et mollit.

 Certifications

Unity Certified Expert: Programmer
March 2022
Unity Technologies

Unreal Engine 5 C++ Developer
June 2023
Epic Games (Udemy)

 Experience

Pixel Forge Interactive Bellevue, WA
Game Developer June 2020 - February 2022

- Core developer on 'Starbound Odyssey,' a sci-fi roguelike that achieved 500K+ sales on Steam with 'Very Positive' user reviews
- Implemented procedural generation systems for level layouts, enemy encounters, and loot drops using Unity and C#
- Designed and programmed player progression systems including skill trees, equipment upgrades, and meta-progression mechanics
- Created robust save/load system supporting cloud saves and cross-platform play between PC and Nintendo Switch
- Integrated third-party SDKs for analytics (GameAnalytics), achievements (Steamworks), and multiplayer networking (Photon)
- Fixed critical bugs and balanced gameplay based on community feedback and telemetry data, releasing 12 post-launch content updates
- Worked closely with artists to implement VFX, animations, and shaders that enhanced visual polish while maintaining performance targets

Mobile Games Studio Remote
Junior Game Developer September 2018 - May 2020

- Contributed to development of three mobile puzzle games built in Unity, collectively downloaded 2M+ times on iOS and Android
- Implemented UI systems, touch controls, and gesture recognition optimized for mobile devices and various screen sizes
- Developed monetization features including rewarded video ads, in-app purchases, and daily reward systems that increased retention by 25%
- Optimized memory usage and load times for mobile platforms, reducing app size by 35% through asset compression and code optimization
- Collaborated with game designers to balance puzzle difficulty curves and progression pacing using A/B testing data

 Awards

Best Gameplay - Ludum Dare 48 April 2021
Ludum Dare
Awarded for puzzle game 'Deeper and Deeper' which ranked in the top 5% overall among 3,000+ submissions

Employee Excellence Award December 2021
Pixel Forge Interactive
Recognized for exceptional contributions to 'Starbound Odyssey' development and dedication to code quality

<> Projects

Echoes of the Void (Indie Game) 2023 - Present

Solo developer for a narrative-driven 2D platformer built in Unity. Features custom dialogue system, branching story paths, and atmospheric pixel art. Currently in development with demo released on itch.io garnering 5K+ downloads and positive community feedback. Planned Steam release Q2 2025.

[View on itch.io](#)

Open Source: Unity Dialogue Framework 2021 - 2023

Created and maintain an open-source dialogue system for Unity with visual node-based editor, localization support, and voice acting integration. Project has 800+ GitHub stars and is actively used by indie developers worldwide. Includes comprehensive documentation and example projects.

[View on GitHub](#)

Game Jam Participation 2019 - Present

Regular participant in Ludum Dare and Global Game Jam events. Created 12+ game prototypes exploring experimental mechanics and art styles. Won 'Best Gameplay' award at Ludum Dare 48 with puzzle game 'Deeper and Deeper' that ranked in top 5% overall.
